PROFILE

Final-year IT undergraduate at the University of Moratuwa with hands-on experience building full-stack web applications using the MERN stack and Next.js. Completed a software engineering internship at Dottech Software, contributing frontend features to production-level products using React, GraphQL, and Apollo Client. Delivered three end-to-end academic projects including a real-time bus transport system with a React Native mobile app and a full-stack salon booking platform with payment integration. Looking to join a product-focused engineering team in Sri Lanka where I can contribute from day one and grow into a strong full-stack role.

EXPERIENCE

Software Engineering Intern

Mar 2025 – Sep 2025

Dottech Software Pvt Ltd

- Delivered 3 production-ready frontend web applications (ModernWalk, Respect, and a Figma-to-Next.js build) across the internship, taking each from requirements through to supervisor-approved completion.
- Built a full-featured online magazine platform (Respect) using React and Next.js, implementing dynamic category routing, article search, volume/edition filtering, SEO optimization, and Apollo Client/GraphQL backend integration – project received positive feedback and was deployed to production.
- Identified and resolved frontend bugs across multiple live projects (NearMe, Evento), debugging issues spanning navigation, admin dashboard, user pages, and responsive layouts across devices.
- Independently learned and applied React Hooks, GraphQL mutations, Apollo Client, and Node.js/Express during the internship, directly applying each to real project tasks within days of learning.
- **Technical Exposure:** Next.js, Tailwind CSS, GraphQL, Apollo Client, Node.js, Express

EDUCATION

B.Sc.(Hons.) in Information Technology and Management (2022-2026 (Expected))

University of Moratuwa

G.C.E Advanced Level Examination

(2020)

Commerce Stream

Accounting A – Economics A – Business Studies B

PROJECTS

Dental Caries Detection Using Dual-View Co-Training

Level 4 Research Project (2025 - 2026)

- Adapting large vision foundation models for automated detection of dental caries in mixed dentition X-rays using a dual-view co-training approach; combines deep learning with limited labeled data strategies to improve diagnostic accuracy
- **Technologies:** Python, deep learning frameworks

Salon Appointment Booking System

Level 3 Individual Project (2024 - 2025)

- Developed a web-based system for salon appointments, providing customers with an intuitive interface to browse services and book appointments. Implement real-time availability tracking, appointment management, and secure payment processing for users. Building an admin dashboard to allow the salon owner to oversee bookings and manage staff schedules.
- **Technologies:** React.js, Node.js, Express.js, MongoDB
- **Frontend :** <https://github.com/ZulfaTh/Essenza-Frontend>
- **Backend :** <https://github.com/ZulfaTh/Essenza-Backend>

Bus Transportation Management System

Level 2 Software project - Group (2023-2024)

- Contributed to a 5-member team building a public bus transport web and mobile app; personally developed the Reviews Ratings system and Lost Found feature using React.js, React Native, Spring Boot, and MySQL.
- **Technologies:** React.js, React Native, Spring Boot, MySQL
- **Frontend :** <https://github.com/ZulfaTh/TransitGO>
- **Backend :** <https://github.com/ZulfaTh/TransitGO-backend>
- **Mobile App :** <https://github.com/ZulfaTh/TransitGO-Mobile>

TECHNICAL SKILLS

Frontend : React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend : Node.js, Express.js, Spring Boot, GraphQL, Apollo Client, RESTful APIs

Databases : MongoDB, MySQL

Tools, Practices: Git, GitHub, JWT Authentication, Figma, Lucidchart, VS Code, IntelliJ

Languages :Python, C

LEADERSHIP ACTIVITIES

- **Member of IEEE - UOM**
- **Committee Lead - Mind Meld 2024 (UoM)**
- **Panel Coordinator:** Career Fair, organized by Rotaract Club (2023)
